

**Synthesis of nanoparticles:
how to understand the formation of nanostructures**

Nuria Lopez,

Institute of Chemical Research of Catalonia, Av. Països Catalans 16, 43007 Tarragona Spain
nlopez@icmq.es

In the present talk I will explain how theoretical simulations hold the key to understand the formation of nanoparticles with specific functionalities.

I will discuss if it is possible to open a new direction in the description of synthesis-property relationships that could enhance our knowledge and control of the properties in the nanoscale.
